TRAN NHAT NAM

Product Data Engineer | Ho Chi Minh City, Vietnam

+84 832255586 | nam.trannhat067@gmail.com | linkedin.com/in/nam-tran-nhat | github.com/namtran067

Summary

Product Data Engineer with 4+ years of experience creating **end-to-end data solutions** – from **ETL/ELT pipelines** and **data platforms** to **data governance, BI and AI applications**. More than a technician: I dive deep into the business needs of each department (Sales, Marketing, Finance, BOD) to turn data into decisions – **cutting ETL operational cost by 90%**, **consultation time by 60%**, and **accelerating decisions up to 3x**. Experienced in data modeling, stakeholder collaboration and integration with Odoo, ERPNext, Haravan and BizFly.

Technical Skills

- **Languages & Query:** Python, SQL
- **Data Engineering:** ETL/ELT, dbt, Dagster, Airbyte, dlt, n8n, Apache Kafka, AWS Lambda, Docker, CI/CD, Git
- **Databases & Modeling:** PostgreSQL, BigQuery, medallion architecture (raw/staging/marts), dimensional modeling, data quality, data lineage, vector databases
- **BI & AI:** Looker, Metabase, Looker Studio, LLM APIs, prompt engineering, RAG / vector search
- **Business Systems & Integration:** Odoo, ERPNext, Haravan, BizFly, AppSheet, Lark Suite, REST APIs, web scraping, WordPress

Experience

Senior Data Engineer | Jemmia **Sep 2023 – Present**

- **Architected the company's centralized data platform:** unified ingestion from Haravan, ERP, warehouse scanning and ad platforms (Google Ads, GA4, Facebook Ads) via dlt, Airbyte and n8n into PostgreSQL; orchestrated with Dagster; transformed data through a **medallion architecture** (raw → staging → marts) with dbt; **cut ETL development effort by 90%** versus legacy Lambda scripts.
- **Championed data governance & quality** across departments: standardized product definitions, SKU/variant rules and naming conventions; wrote **dbt tests** and validation checks on critical marts; documented **data lineage** with dbt docs; reorganized Lark Base data and built mini ETL flows delivering clean data back to department workspaces.
- Rebuilt the company CRM on **BizFly** (migrating from **Odoo** with full data standardization and backfill), then led the ERP transition to **ERPNext** – rollout planning, production deployment with **CI/CD**, and **REST API** source-system integration. Result: **100% consolidated customer information** with a clear end-to-end journey.
- Built BI for Sales, Marketing, Finance and BOD on Looker, migrated to Metabase with fine-grained permissions and an AI-powered natural-language Q&A layer – **enabling strategy shifts up to 3x faster**.
- Built AI-driven data products: optimized SQL and data marts for **Salesaya (AI sales assistant), cutting consultation time by 60%**; captured conversations via **Apache Kafka webhooks** into a vector database for RAG-based analysis; scraped Facebook audience data (Custom Lens) into the warehouse; owned CI/CD and Dockerized deployments.

Data Analyst (Startup) | BabyBet **Jul 2023 – Sep 2023**

- Conducted market research and surveys; **automated competitor data scraping** (e.g., Grab) to analyze cost of goods, margins and operating expenses; delivered AI-assisted analyses and dashboards guiding product strategy and pricing.

Data Analyst | Avli Group JSC **Feb 2023 – Jul 2023**

- **Built automated ETL flows** (Python, AWS Lambda, Zapier) for apartment and customer data, achieving **2x faster processing** than manual Excel workflows.
- Designed and maintained data models, dashboards and reports tracking apartment inventory and individual sales performance; **boosted apartment-check efficiency by 50%**; delivered analyses that shaped leadership strategy.
- Integrated the database with AppSheet to build the company's CRM app for product management.

Data Research Assistant | ASIA Research Lab **Jun 2022 – Jan 2023**

- Contributed to a Vietnamese Speech-to-Text project: proposed data-source strategies, **built audio-text labeling workflows with Label Studio**, and trained/evaluated ASR models with Python and Docker.

Education

University of Information Technology **2019 – Jun 2023**
Bachelor of Data Science Ho Chi Minh City, VN
GPA: 8.5/10 | IELTS 7.0

Personal Projects

Project Name 1 (Replace Me) **Year**

- Describe the project, technologies used, and a measurable outcome. For example: ”Built a real-time analytics dashboard for X, processing 10k+ events/day with Python and PostgreSQL.”

Project Name 2 (Replace Me) **Year**

- Describe the project, technologies used, and a measurable outcome. For example: ”Developed a RAG-based Q&A chatbot using LLM APIs and vector search, reducing information lookup time by X%.”

Project Name 3 (Replace Me) **Year**

- Describe the project, technologies used, and a measurable outcome.
